Developer Student Clubs AKGEC

WE LEARN | WE DEVELOP | WE DEPLOY

About Us

"GDSC-AKGEC" is the developer students's club under Ajay Kumar Garg Engineering College.

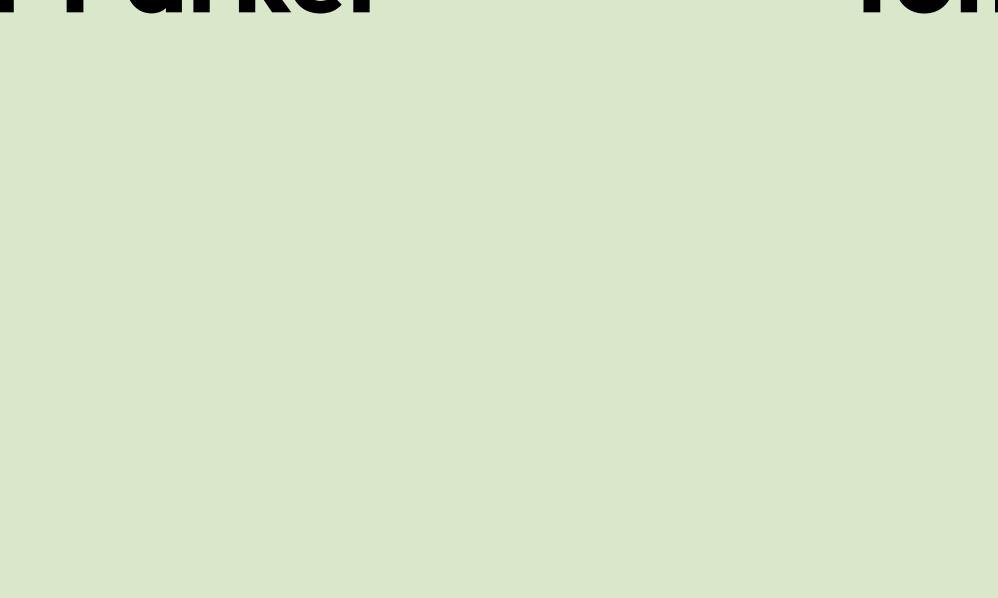

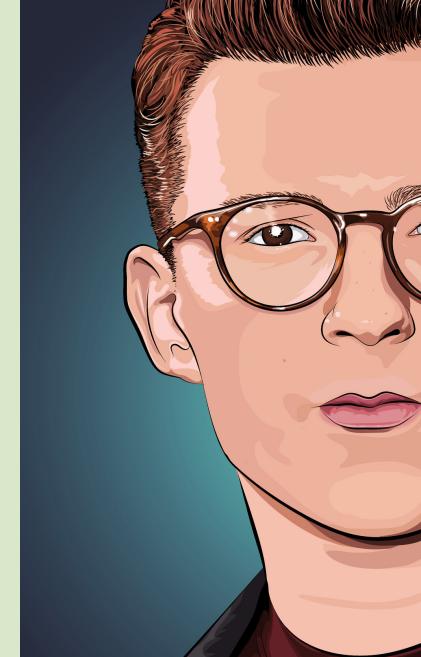

Google Developer Student Clubs are university based community groups for students interested in Google developer technologies. By joining a GDSC, students grow their knowledge in a peer-to-peer learning environment and build solutions for local businesses and their community.

Domains

Web Development

Web development is the building and maintenance of websites; it's the work that happens behind the scenes to make a website look great, work fast and perform well with a seamless user experience. Web developers, or 'devs', do this by using a variety of coding languages.

Machine Learning

Machine learning is a subfield of artificial intelligence, which is broadly defined as the capability of a machine to imitate intelligent human behavior. Artificial intelligence systems are used to perform complex tasks in a way that is similar to how humans solve problems.

App Development

Mobile application development is the process of creating software applications that run on a mobile device, and a typical mobile application utilizes a network connection to work with remote computing resources.

Design influences what we think, the way we feel and the decisions we make. And when it is exceptionally well-done, good design is virtually invisible. We don't think about the creative effort or thought process that leads up to the final product. We simply know the experience is seamless and enjoyable.

Our Goal

Creativity Inspires Our Implementation

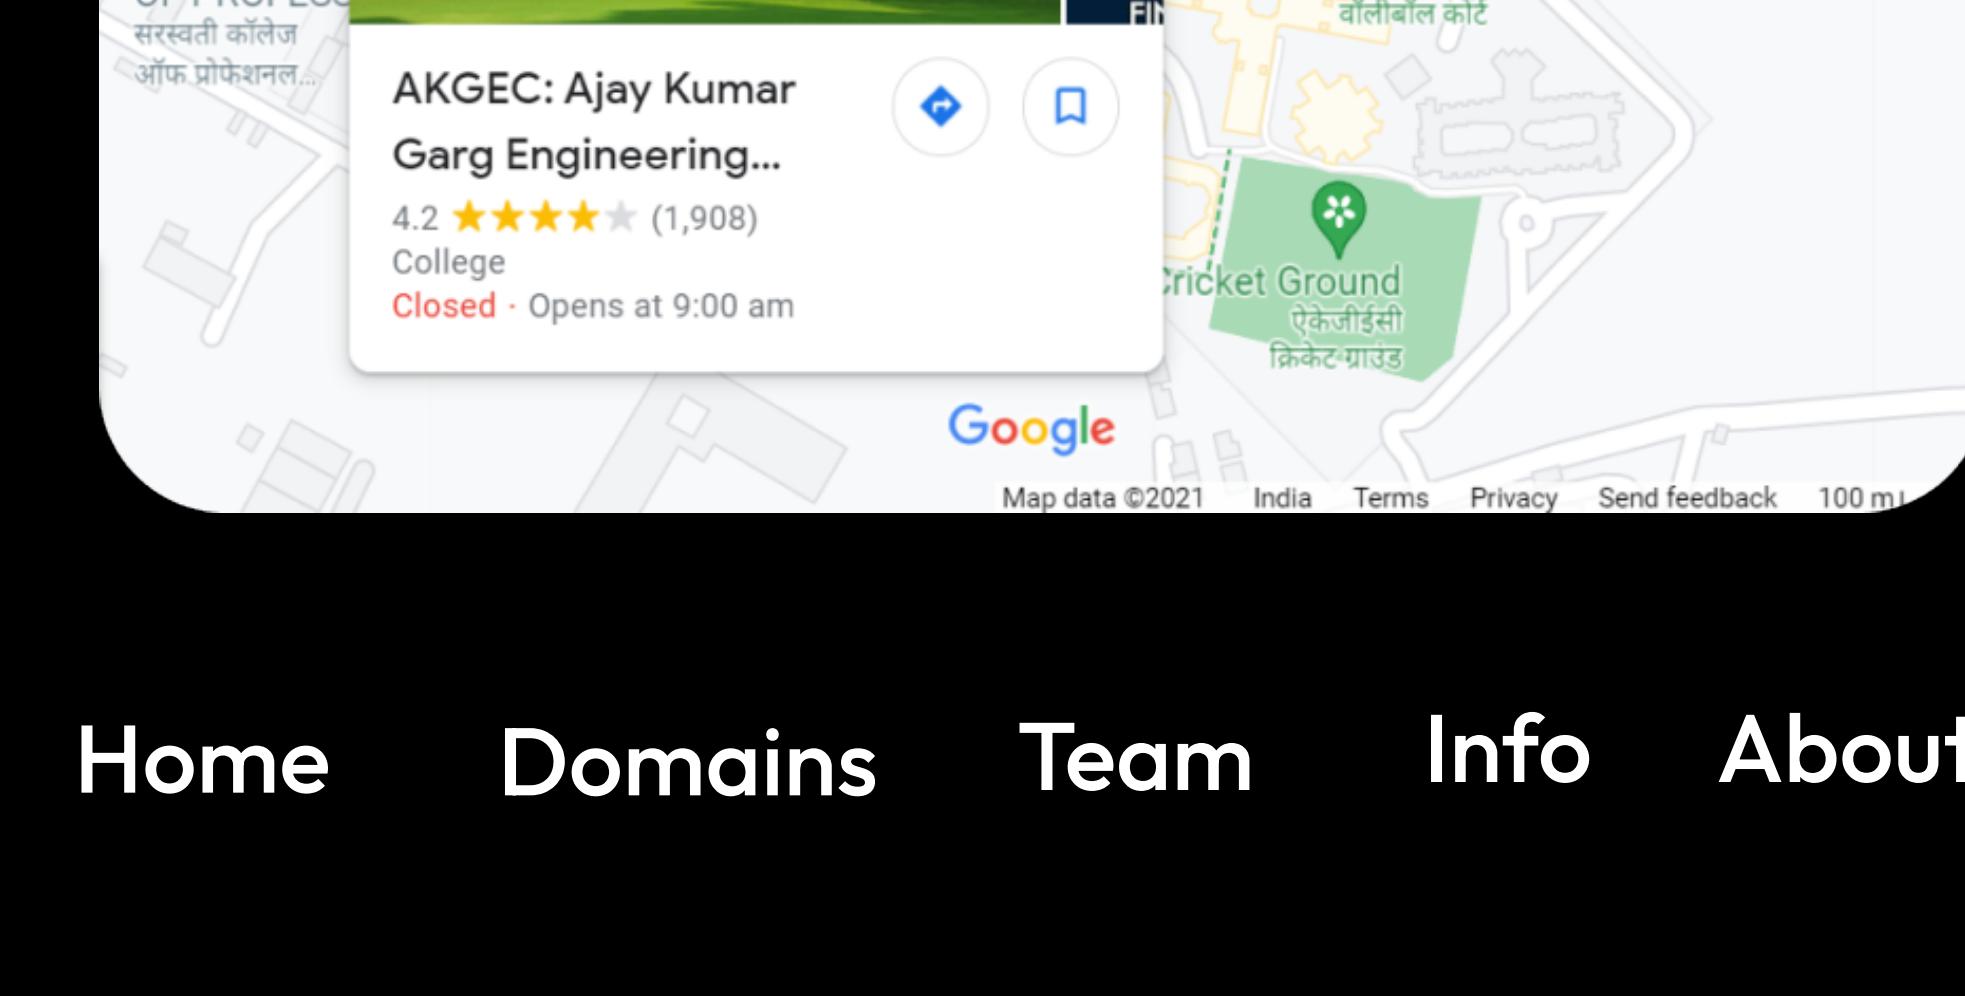

We at DSC-AKGEC are a passionate group of people who work towards bringing a change in the ecosystem of development around the campus. We want to create a healthy environment for the budding developers to exploring solutions to real life problems and promote the developer culture.
